

Braid/Hot knife cutters

Hilltop Products high quality braid/hot knife cutters are the ideal solution for cutting braid, ropes, synthetics fabrics, bands, belting fabric, webbing and cords. These cutters give a clear neat cut that also seals the rope to prevent fraying.

Our hand held cutter is recommended for short-time operation and low volume. Heat up time is approx 6-8 seconds. Heat may be controlled by switching on and off. This cutter is suitable for cutting rope up to 18mm in diameter.

Our bench mounted cutter is a heavy duty, constant usage hot knife cutting unit, designed to cut rope up to 50mm in diameter. This cutter features a built in cooling fan and the blade maintains a constant temperature for as long as the unit is switched on. The blade can also be easily removed.
