

## Hilltop Commercial Heat gun Kit

### Applications

Hilltop's commercial heat gun kit is comprised of a durable hot air gun for professional continuous operation with 4 nozzles for various applications. Using the nozzles gives even heating to the surface area. Even heating means a better, more professional looking end product and a more secure connection underneath, which is an all out win at the end of the day.

The hot air flow of a heat gun is less dangerous than a naked flame, and is ready to operate almost immediately after being switched on. This means the gun can be powered down during brief pauses in work without having to worry about relighting when needed again .

This heat gun is lightweight and easy-to-use which makes it far less likely to scorch wood or crack glass when used correctly to strip paints and other applications.

### IMPORTANT

Unlike other heat guns on the market this quality product has the added benefit of the air vents being on either side of the gun as opposed to the rear. This greatly improves performance and prolongs the life of the gun when used in the hands-free positions. This due to greatly improved ventilation to prevent overheating.

Technical Data	
Power Supply	230V~50Hz
Power Input	2000W
Speed	I:300 l/min - II:600 l/min
Protection Class	II
Air Temperature	300°C / 600°C

### Features and Benefits:

- 2 heat settings
- Robust commercial heat gun
- 4 nozzles provided with the gun for various applications
- For use with dual wall and single wall tubing along with solder sleeve devices and moulded shapes
- Complete kit provided in a box

Incl.  
4 x
