

HILWRAP - Wraparound sleeve

Hilwrap wraparound sleeve is a self-closing oversleeve that provides mechanical protection. Woven from monofilament (weft) and multifilament (wrap) polyester yarns, it provides a lightweight, cost effective and tough solution for protection of a wide range of components. It does not trap heat or moisture.

Hilwrap's self-wrapping, low profile and flexible design fits tightly to wire harnesses making it an ideal bundling solution in restricted areas without affecting the flexibility of the components it protects. Its inherent flexibility allows it to conform to irregular shapes and contours.

Hilwrap allows for fast and easy building of wire and cable assemblies, it allows for easy breakouts and can be installed on completed assemblies due to its open design.

Typical applications

- Cable management (Audio/Video)
- Automotive harnesses
- Hoses and tubing
- A/C line
- Hydraulic and fuel lines
- Control Cables

Features

- Operating temperature -70°C - 130°C
- Easy installation
- Flexible
- Fluid and chemical resistant

Standard Colours & Colour Codes

Black - 0

White - 9

Standard products:- Hilwrap is available in black or white and can also be supplied in cut lengths
