

HILLSHRINK HDTR-D4 HEAT SHRINK TUBE PROCESSING MACHINE (1600W)

The Hillshrink HDTR-D4 offers increased control over time and heat intensity settings with user friendly digital control panels.

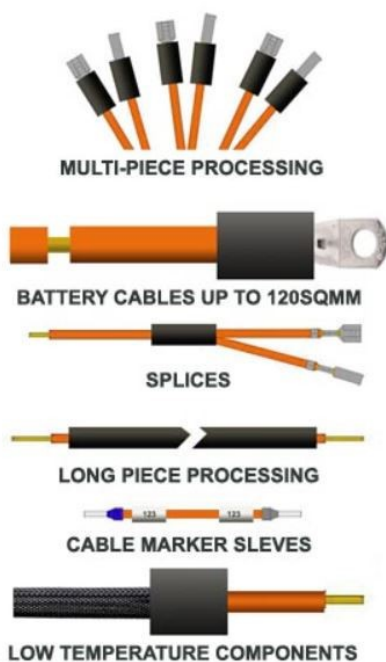

Faster, safer and give the operator full quality control over the shrink process, these machines reduce costs when compared to the traditional heat gun method.

HDTR D4: 1600W, comes with 4 lamps. Best suited to lighter, coloured or more heavy duty applications but will also shrink black.

APPLICATIONS

- **Processes up to 38mm OD**
- **Uses 75% less energy than a traditional heat gun method:** Halogen technology to reduce operating costs.
- **3.5" Touch Screen HMI;** New Touch screen control for increased programming capability.
- **Up to 99 program memory:** also save and recall programs from memory.
- **Sequential time processing for up to 5 different time settings.**
- **Almost totally silent:** Keeps the heat generated within the machine.
- **Audible cycle buzzer and counter functions.**
- **Cycle abort button.**
- **Heat intensity control:** Heat adjustment eliminating risk of burning shrink tubing.
- **360 Degree Shrinking:** Innovative design allowing 360 degree shrinking without the need for turning the cable.
- **Processing viewing window:** Operator friendly viewing window allowing optical inspection and easy set up.
- **Light weight design with carry handle:** Portable and fully electric for easy transportation.
