

HILLSHRINK MTP-4 PROCESSING MACHINE SHRINKING HEAVY DUTY XL SHRINK TUBE (2000W)

The Future of XL Heat Shrink tube processing is here! The New Hilltop MTP-4 Processing machine. Shrinking Heavy Duty XL shrink tube easily, quickly and safely. Furthermore it has unrivalled capability when compared with traditional shrinking methods. If you've ever tried shrinking large diameter tubing you will know this is always especially time consuming, awkward and requires constant operator concentration.

The MTP-4 looks to address these issues by simplifying the process. In addition, due to the open plan design it is easy to build bespoke holding or sliding fixtures around the heat chamber.

MTP-4 Features

- **HUGE Processing Window 210mm Lx 140mm Wx 75mm H**
- **Up to 75% Energy saving compared with other shrinking methods**
- **Special Ultra low Glare IR heat lamps**
- **3.5" Touch screen HMI**– New Touch screen control for increased programming capability.
- **Up to 99 program memory**– Also save and recall programs from memory
- **Sequential time processing for up to 5 separate time settings**
- **Easy program set up**
- **Very Low Consumable Costs**
- **Safe & Quiet Operation**
- **Easy Loading**– Due to open plan design
- **Audible Cycle Buzzer**– Hence giving the operator clear signals for start and stop.
- **Cycle counter with reset function**- Therefore allowing operators to cancel a faulty cycle.
- **360 Degree Shrink without turning cable**
- **Operator functions disable**
- **Cycle abort button**
- **Manual and Timer modes**
- **3000-5000hr Lamp Lifespan**
- **Fast Shrink Time**
- **Open Design Allowing For External Fixtures, Sliders Etc...**
