## Product Information

- This tool will burn its way through the polystyrene no pressure is required
- You can cut out and carve a variety of simple or intricate polystyrene shapes
- Great for school projects, hobbies, craft and home use .
- Using the on/off switch the pen heats up in less than 30 seconds for easy cutting.
- The heated tool reaches 200°C (400 degrees F°C)
- Do not exceed 30 minutes of cutting time in each session, rest the tool by turning the power off after 30 minutes of continuous use.

### Step by step instructions

- Plug the cutter into an outlet and turn it on, making sure you are in a well ventilated area
- Wait 30 seconds for the wand to heat up, then begin shaping the polystyrene allowing the blade to determine the cutting speed.
- DO NOT force the wand through the polystyrene.
- When finished or not in use remember to turn off the power switch.
- Rest the tool safely on its stand, making sure the wand is not touching anything.
- Unplug the cutter when you have finished working.
- Adults please take care to supervise children.
