

Knitted Wire Mesh Tape

Mesh Tape has a number of applications but is used mainly for EMC / RFI screening of electrical power, control, data and communication cables and for earth continuity in cable joints. In addition, the springy nature of the tape lends itself to providing a mechanical cushion against adjacent surfaces.

Application is both quick and simple. The tape is wrapped around the item to be protected to give a 50% overlap that produces 4 layers of screening.

Features

- Standard sizes of 25mm and 50mm wide
- Ideal for use on complex, irregular surfaces
- Light weight and easy to apply
- 10M or 25M coils
- Option to supply in pre-cut lengths

Choice of Materials

- **Electro tin-plated copper**
- **Nickel-plated copper**
- **Galvanised steel**
- **Alternative non-ferrous & ferrous materials on request**
