

Platinum Cured Silicone Tubing -

Medical grade non-toxic national water council approved peristaltic grade platinum cured silicone tubing.

Making the right choice for your silicone tubing requirements is made easy by our comprehensive range of stock sizes. Being manufactured in our Platinum cured silicone gives you a number of advantages over conventional Peroxide cured silicones.

Features:

- Resistant to oxidation, ozone and radiation
- Does not support bacterial growth
- Withstands repeated sterilisation
- Non-reactive to body tissue and fluid
- Non-adherence tissue
- Retains physical properties in extreme conditions
- Non toxic
- Non yellowing
- No peroxide by-products
- High tear strength as standard
- High gloss finish
- Excellent quality
- Highly hydrophobic
- Extended life in peristaltic pumps.

Specification:

- Transparent
- Shore A Hardness: 60
- Temperature: -60°C to 200°C

Applications:

- Bio technology, Agricultural & Research laboratories
- Food and dairy liquids / equipment
- Transfer of sterile liquids.
- Suction Drainage
- As Gasket for Autoclave & Ovens
- Pharmaceutical
