

Professional Crimping Tool for Cord End Bootlace Ferrules

Hand held manual operated ergonomic 6 jaw crimping tool with ratchet mechanism for complete controlled crimp cycle, extra long handles and new ratchet system reduces crimping effort and the risk of repetitive strain injuries . For use with standard insulated & non-insulated cordend terminals 0.5 to 10mm/sq to Din standard 46228 Pt1 & 4.

Can be supplied with calibration certificate if required.

For crimping of insulated & non-insulated cordend terminals from 0.5mm to 10mm/sq. Meets the compression ratio requirements of BSEN 60999 & BSEN60998.

Features.

- High precision cast jaw set for optimum compression.
- New ratchet control mechanism ensures precise controlled crimping cycle and reduces crimping effort.
- Extra long handles for reduction of handle pressure.
- Emergency release lever for detachment of ratchet control during crimp cycle
- Automatic opening of crimp tool on completion of crimp cycle.
- Calibration /load adjustment device.
- Ergonomically designed moulded plastic handles for reduction of operator fatigue.

Material specification

Jaw set: carbon steel grade SCM440.

Frame: material steel grade S45C.

Handles : PP
