

## Professional Crimping Tool for Insulated Terminals

Hand held manual operated ergonomic 3 jaw crimping tool with ratchet mechanism for complete controlled crimp cycle, extra long handles and new ratchet system reduces crimping effort and the risk of repetitive strain injuries . For use with standard pre-insulated terminals red, blue & yellow, 0.5 to 6mm/sq. Can be supplied with calibration certificate if required.

For crimping of pre-insulated terminals from 0.5mm to 6mm/sq.

Meets the compression ratio requirements of BSEN 60352-2:2006 & BS5G178:1992.

### Features

High precision cast jaw set for optimum compression.

New ratchet control mechanism ensures precise controlled crimping cycle and reduces crimping effort.

Extra long handles for reduction of handle pressure.

Emergency release lever for detachment of ratchet control during crimp cycle

Automatic opening of crimp tool on completion of crimp cycle.

Calibration /load adjustment device.

Ergonomically designed moulded plastic handles for reduction of operator fatigue.

### Material specification

Jaw set: carbon steel grade SCM440.

Frame: material steel grade S45C.

Handles : PP

weight: 0.65 kgs.
